

70 Dover St

March 21st 63

My Dear Friend Garrison

I send
²⁹ you herewith, as I promised,
my Uncle's article from
last evening's Transcript.
I think you'll agree with
me that it is hardly worth
while to print the whole
of it, — so I have indicated
by pencil mark on margin
what parts I think best,
subject of course to your
better judgment. Perhaps
what I have marked will
not make more than two
thirds of a column of your
paper. — All the details
of the "Port Royal" and "Detroit"
outrages have already been

published by you, —
and you will also agree
with me, doubtless in
disseut as to the suggestion
of colonization or emigra-
tion of our colored brethren
as essential to their prosper-
ity or ours. — So we may
omit that also.

After all, the Chief interest
of these articles of my once
"old fossil" and conservative
relative "Sigma" is — the
accuracy and fullness of
their historic details and
statistics, and though they
do not yet indicate that
he is fully up to the appre-
ciation of all the heights
and depths of the Christian

principally involved in our
Antislavery Enterprise I
can assure you ~~he~~ is rapidly
on the way to it. — Many
a time, of late, as I speak
with him on the patient,
long suffering, self denying
labors of yourself, and
Phillips and others for the
past thirty years or more
in the advocacy of those
principles ^{and their real issues} have I seen the
sympathizing tears filling up
his old eyes! He is
manifestly progressing
as you will see by the few
verbal concessions he makes
in the enclosed article to the
principles and claims of abo-
litionism. — I submit the

whole article to your judgment, and doubt not he will be gratified in seeing a portion of it in print through the "Liberator." —

By the way please tell me whether he is a subscriber to your paper. — He ought to be. —

Can you not come in and see us occasionally with the rest of your family on Sunday Evening? — We have a general understanding that we keep "open house" there for meeting and converse of all who have human sympathies and affections. —
Sincerely & fraternally Yrs
John T. Sargent.
